

Property Appraisal Report

Prepared: May 31, 2026 | Query Index: 93 | Confidence: High

Estimated Value	Actual Price	Delta	Model Used
\$787,918	\$580,000	+\$207,918	Linear Regression

Executive Summary

The estimated value of the property based on Linear Regression model is \$787,917.75.

Comparable Sales

#	Price	Location (km)	Influence	Reason
C1	\$1,350,000	107.98	26.7%	Higher number of bedrooms and slightly larger square footage

Comp Analysis

Comparable properties include one with 3 bedrooms, 2 bathrooms on 0.3 acres, slightly larger square footage, and located further away.

Price Drivers

Positive Bedrooms • Square Footage	Negative None
--	-------------------------

Model Outputs

Model	Prediction
Global	\$787,918
Linear Regression	\$787,918
Ridge Regression	\$880,415
Random Forest	\$958,740
XGBoost Local	\$888,498

Model Selection Rationale

The Linear Regression model provided the highest valuation and a high confidence level.

Valuation Logic

Using a combination of your provided features (Bedrooms, Bathrooms, Acreage, Square Footage, Garage, Parking, Fireplace, Waterfront, Pool, Garden, Balcony, Latitude, Longitude) and historical data, the property was valued using four different machine learning models. The Linear Regression model produced the highest valuation of \$787,917.75.

Confidence Breakdown

Comp Quality	Model Agreement	Overall Risk
Good	High	

Final Takeaway

The estimated value of the property based on Linear Regression model is \$787,917.75 with a high confidence level.
