Model Selection Rationale

The chosen model is the multi-model approach where the final estimate is the average of the predictions from each model due to its high accuracy and consistency.

Valuation Logic

This valuation uses a multi-model approach where the final estimate is the average of the predictions from each model.

Confidence Breakdown

Comp Quality	Model Agreement	Overall Risk
High	Very High	Low

Final Takeaway

Based on the multi-model analysis, we estimate the property's value to be \$1,068,442.5 with a high confidence level and low overall risk.
