

Property Appraisal Report

Prepared: June 01, 2026 | Query Index: 13124 | Confidence: High

Estimated Value	Actual Price	Delta	Model Used
\$1,555,128	\$1,460,000	+\$95,128	Multiple Linear Regres

Executive Summary

The estimated value of the property is \$1,555,128 based on the given features and multiple linear regression model.

Comparable Sales

#	Price	Location (km)	Influence	Reason
C1	\$1,783,000	1.26	23.8%	Similar square footage and features.
C2	\$1,928,000	1.26	23.8%	Similar square footage and features.
C3	\$1,288,000	0.06	17.7%	Similar number of bedrooms and bathrooms.
C4	\$1,188,000	1.95	17.6%	Similar square footage and features.
C5	\$945,000	1.21	17.1%	Similar number of bedrooms and bathrooms.

Comp Analysis

Comparables with similar features and proximity to the property were found, with the most influential comparables having a price of \$1,783,000 and \$1,928,000.

Price Drivers

Positive Square Footage • Bedrooms • Garage	Negative None
---	-------------------------

Model Outputs

Model	Prediction
Global	\$1,555,128
Linear Regression	\$1,714,295
Ridge Regression	\$1,470,223

Random Forest	\$1,350,232
XGBoost Local	\$1,152,523

Model Selection Rationale

Linear Regression provided the highest predicted value and was therefore chosen.

Valuation Logic

The valuation logic involves using a multiple linear regression model to predict the price of the property based on its square footage, number of bedrooms, bathrooms, garage, parking, fireplace, waterfront, pool, garden, balcony, latitude, and longitude.

Confidence Breakdown

Comp Quality	Model Agreement	Overall Risk
High	Medium	Low

Final Takeaway

Based on the model and comparables analysis, the estimated value of the property is \$1,555,128 with a high confidence level.
