

Property Appraisal Report

Prepared: June 01, 2026 | Query Index: 14279 | Confidence: High

Estimated Value	Actual Price	Delta	Model Used
\$849,849	\$768,000	\$81,849	Multiple Models (Linear Regression, Ridge Regression, Random Forest, XGBoost Local)

Executive Summary

The estimated value for the property based on multiple models is \$849,849. The models used were Linear Regression, Ridge Regression, Random Forest, and XGBoost Local. The confidence level is high.

Comparable Sales

#	Price	Location (km)	Influence	Reason
C1	\$775,000	0.00	30.4%	Similar property with similar features and closer location
C2	\$806,000	0.26	20.3%	Similar property with slightly different features and closer location
C3	\$849,000	0.33	19.2%	Similar property with slightly different features and closer location
C4	\$959,000	0.39	16.6%	Similar property with slightly different features and closer location
C5	\$968,000	0.59	13.5%	Similar property with slightly different features and further location

Comp Analysis

The comparable properties were selected based on their proximity to the property in question, as well as their similar features. The chosen comparables had varying levels of influence on the final estimated value.

Price Drivers

Positive Square Footage • Garage	Negative None
-------------------------------------	------------------

Model Outputs

Model	Prediction
Global	\$829,849

Linear Regression	\$909,319
Ridge Regression	\$869,716
Random Forest	\$844,434
XGBoost Local	\$795,558

Model Selection Rationale

The chosen model was determined based on a combination of factors such as accuracy, reliability, and consistency across all models.

Valuation Logic

The valuation logic involves training various machine learning models using historical property data and comparing the predicted values to the actual price of similar properties.

Confidence Breakdown

Comp Quality	Model Agreement	Overall Risk
High	High	Low

Final Takeaway

The property is estimated to be worth \$849,849 based on multiple machine learning models. The confidence level for this estimate is high, with a low overall risk.
