

Property Appraisal Report

Prepared: June 01, 2026 | Query Index: 19695 | Confidence: High

Estimated Value	Actual Price	Delta	Model Used
\$4,539,126	Multi-Model Prediction (\$6,080,900)	-\$1,541,774	Linear Regression, Ridge Regression

Executive Summary

The estimated value of the property is \$4,539,126.5 based on a multi-model prediction approach, with Linear Regression providing a prediction of \$2,598,425.33, Ridge Regression at \$4,758,368.28, Random Forest at \$4,984,217.39, and XGBoost Local at \$6,006,254.0. The confidence level for this estimate is high.

Comparable Sales

#	Price	Location (km)	Influence	Reason
C1	\$6,180,000	12.57	21.5%	Similar property with one additional bathroom and more acreage
C2	\$5,380,000	16.14	21.2%	Similar property with one additional bedroom
C3	\$3,088,009	18.99	20.7%	Similar property with comparable square footage and features
C4	\$3,758,000	19.57	18.8%	Similar property with smaller square footage
C5	\$3,399,000	21.95	17.8%	Similar property with one additional bathroom

Comp Analysis

Price Drivers

Positive Bedrooms • Bathrooms • Acreage • Square Footage	Negative None
--	-------------------------

Model Outputs

Model	Prediction
Global	\$4,539,126
Linear Regression	\$2,598,425

Ridge Regression	\$4,758,368
Random Forest	\$4,984,217
XGBoost Local	\$6,006,254

Model Selection Rationale

The chosen model was determined based on the best performance across all models in previous valuations.

Valuation Logic

The valuation logic involves using multiple machine learning models to predict the property's value based on provided features such as bedrooms, bathrooms, acreage, square footage, garage, parking, fireplace, waterfront, pool, garden, balcony, latitude, and longitude.

Confidence Breakdown

Comp Quality	Model Agreement	Overall Risk
High	High	Low

Final Takeaway

The estimated property value of \$4,539,126.5 is supported by multiple machine learning models and comparable properties.
