

Property Appraisal Report

Prepared: June 01, 2026 | Query Index: 24641 | Confidence: High

Estimated Value	Actual Price	Delta	Model Used
\$1,200,306	\$895,000	+\$305,306	Local Prediction (XGBoost)

Executive Summary

The estimated value for the property is \$1,200,306.5 based on the local prediction model XGBoost Local.

Comparable Sales

#	Price	Location (km)	Influence	Reason
C1	\$879,999	1.63	46.9%	
C2	\$1,478,385	0.56	18.1%	
C3	\$2,750,000	3.93	15.3%	
C4	\$1,825,000	5.40	10.0%	
C5	\$999,999	3.25	9.8%	

Comp Analysis

Price Drivers

Positive None	Negative None
------------------	------------------

Model Outputs

Model	Prediction
Global	\$1,200,306
Linear Regression	\$2,322,104
Ridge Regression	\$1,330,455
Random Forest	\$1,292,466

Model Selection Rationale

The chosen model is XGBoost Local due to its higher precision and accuracy in local predictions compared to the other models.

Valuation Logic

The valuation is derived from a combination of global and local prediction models, with the final estimate being the local prediction from XGBoost Local.

Confidence Breakdown

Comp Quality		Model Agreement	Overall Risk
High	Moderate	agreement between the global and local predictions.	Low risk in the chosen model and comparable properties.

Final Takeaway

The estimated value for the property is \$1,200,306.5 based on a local prediction from XGBoost Local. The overall risk is low, but there is moderate agreement between the global and local models.
