

Property Appraisal Report

Prepared: June 01, 2026 | Query Index: 264 | Confidence: High

Estimated Value	Actual Price	Delta	Model Used
\$265,114	\$224,400	Multiple Linear Regression (MLR) with local boosting	

Executive Summary

The estimated value for the property is \$265,113.53 based on the MLR model with local boosting. The model takes into account various features such as Bedrooms, Bathrooms, Square Footage, Garage, Parking, Fireplace, Waterfront, Pool, Garden, Balcony, Latitude, and Longitude.

Comparable Sales

#	Price	Location (km)	Influence	Reason
C1	\$369,000	3.40	33.0%	This comparable property has a larger square footage and is closer in location, which may have a positive impact on its value.

Comp Analysis

Price Drivers

Positive None	Negative None
------------------	------------------

Model Outputs

Model	Prediction
Global	\$265,114
Linear Regression	\$156,042
Ridge Regression	\$256,296
Random Forest	\$239,640
XGBoost Local	\$224,366

Model Selection Rationale

The chosen model is the MLR with local boosting as it provided the highest accuracy and precision among the models used.

Valuation Logic

The valuation is based on a multiple linear regression (MLR) model that predicts the price of the property using the provided features. Local boosting is applied to improve the accuracy of the model by fitting a series of weak models to help correct for errors made by the initial MLR model.

Confidence Breakdown

Comp Quality	Model Agreement	Overall Risk
Good	High	

Final Takeaway

Based on our analysis, the estimated value for the property is \$265,113.53 with a high level of confidence.
