

# Property Appraisal Report

Prepared: June 01, 2026 | Query Index: 27658 | Confidence: High

| Estimated Value | Actual Price | Delta     | Model Used    |
|-----------------|--------------|-----------|---------------|
| \$140,638       | \$60,000     | +\$80,638 | XGBoost Local |

## Executive Summary

The estimated value for the property based on XGBoost Local model is \$140,637.95 with a high confidence level.

## Comparable Sales

| #  | Price     | Location (km) | Influence | Reason                                                                                |
|----|-----------|---------------|-----------|---------------------------------------------------------------------------------------|
| C1 | \$165,000 | 1.03          | 24.0%     | Similar square footage and acreage, slightly higher number of bedrooms and bathrooms. |
| C2 | \$156,000 | 1.96          | 22.4%     | Similar square footage and acreage, fewer bedrooms and bathrooms.                     |
| C3 | \$59,900  | 61.79         | 18.7%     | Lower square footage and acreage, fewer bedrooms and bathrooms.                       |
| C4 | \$160,000 | 1.16          | 17.9%     | Similar acreage and parking, lower square footage and fewer bedrooms.                 |
| C5 | \$176,000 | 0.67          | 17.0%     | Similar acreage, higher garage presence but fewer bedrooms and bathrooms.             |

## Comp Analysis

The top comparables were chosen based on their proximity and feature similarities to the property.

## Price Drivers

|                                      |                  |
|--------------------------------------|------------------|
| Positive<br>Square Footage • Acreage | Negative<br>None |
|--------------------------------------|------------------|

## Model Outputs

| Model  | Prediction |
|--------|------------|
| Global | \$140,638  |

|                   |           |
|-------------------|-----------|
| Linear Regression | \$101,509 |
| Ridge Regression  | \$120,345 |
| Random Forest     | \$148,192 |

Model Selection Rationale

XGBoost Local model has the highest prediction accuracy for this specific query.

Valuation Logic

Model uses various factors such as location, square footage, number of bedrooms and bathrooms, acreage, garage, parking, fireplace, waterfront, pool, garden, balcony, latitude, longitude to predict the property value.

Confidence Breakdown

| Comp Quality | Model Agreement | Overall Risk |
|--------------|-----------------|--------------|
| High         | High            | Low          |

Final Takeaway

The estimated value for the property is \$140,637.95 with a high confidence level. The XGBoost Local model was chosen due to its high prediction accuracy. The top comparables were chosen based on their proximity and feature similarities.
