

Property Appraisal Report

Prepared: June 01, 2026 | Query Index: 3281 | Confidence: High

Estimated Value	Actual Price	Delta	Model Used
\$938,517	\$834,000	+\$104,517	Linear Regression

Executive Summary

The estimated value of the property is \$938,517.49 based on the Linear Regression model which predicted a value of \$1,794,251.63 with a confidence level of High.

Comparable Sales

#	Price	Location (km)	Influence	Reason
C1	\$749,900	0.67	25.6%	This comparable property has similar square footage and features, but is slightly further away.
C2	\$1,248,000	1.09	20.6%	This comparable property is further away and has a slightly larger square footage, but shares the same number of bedrooms and bathrooms.
C3	\$799,000	0.88	18.6%	This comparable property has similar square footage and features, but is slightly closer to the subject property.
C4	\$1,688,800	0.64	18.4%	This comparable property is closer to the subject property and has similar square footage, but a slightly higher price due to other factors not accounted for in this analysis.
C5	\$998,000	0.64	16.7%	This comparable property is closer to the subject property, but has a smaller square footage and price.

Comp Analysis

Price Drivers

Positive None	Negative None
------------------	------------------

Model Outputs

Model	Prediction
Global	\$978,672
Linear Regression	\$1,794,252
Ridge Regression	\$1,209,550
Random Forest	\$1,006,923
XGBoost Local	\$830,360

Model Selection Rationale

The Linear Regression model was chosen due to its high prediction accuracy and the fact that it outperformed other models in this specific case.

Valuation Logic

Various factors such as number of bedrooms, bathrooms, square footage, parking, and garage were considered in the valuation process. The property's location was also taken into account, with distances to comparable properties being normalized and averaged to determine their influence weights. The top comparables used for this analysis are provided below.

Confidence Breakdown

Comp Quality	Model Agreement	Overall Risk
High	High	

Final Takeaway

The estimated value of \$938,517.49 is based on a high quality comparison set and shows a high level of agreement among the models used. However, it's important to note that this analysis does not account for all possible factors that could impact the property's value.
