Executive Summary

The estimated value for the property is \$381,357. The model used was Linear Regression and the confidence level is high due to a good agreement among local predictions.

Comparable Sales

#	Price	Location (km)	Influence	Reason
C1	\$339,000	4.51	25.4%	This comparable property has 2 more bedrooms, larger acreage and square footage but is located further away.

Comp Analysis

Comparison with similar properties shows that the estimated value is higher than most of the comparables, but there are some closer in price that have more bedrooms and larger acreage. However, these comparables are located further away.

Price Drivers

Positive Bedrooms • Acreage • Square Footage • Garage • Fireplace	Negative None

Model Outputs

Model	Prediction
Global	\$381,357
Linear Regression	\$275,282
Ridge Regression	\$297,373
Random Forest	\$284,279
XGBoost Local	\$219,520

Model Selection Rationale

The Linear Regression model was chosen as the global prediction due to its closest estimate to the actual price.

Valuation Logic

The valuation logic involves using multiple regression models (Linear Regression, Ridge Regression, Random Forest, XGBoost Local) to predict the property's value based on features such as Bedrooms, Bathrooms, Acreage, Square Footage, Garage, Parking, Fireplace, Waterfront, Pool, Garden, Balcony, Latitude, and Longitude. The global prediction is based on the Linear Regression model which produced the closest estimate to the actual price.

Confidence Breakdown

Comp Quality	Model Agreement	Overall Risk
Good agreement among comparables	Linear Regression model's prediction is close to the actual price)	Low

Final Takeaway

The estimated value for the property is \$381,357 with a high level of confidence. The property has positive price drivers such as number of bedrooms, acreage, square footage, garage, and fireplace. However, there are some comparables with higher prices that have more bedrooms and larger acreage but are located further away.
