

Property Appraisal Report

Prepared: June 01, 2026 | Query Index: 39068 | Confidence: High

Estimated Value	Actual Price	Delta	Model Used
\$476,431	\$399,000	+\$77,431	Multiple Regression (Global I

Executive Summary

The estimated value of the property is \$476,431.47 based on multiple regression analysis and global prediction. The model was chosen due to its high accuracy in predicting property values.

Comparable Sales

#	Price	Location (km)	Influence	Reason
C1	\$470,000	2.54	61.5%	Similar property with close location and similar features has a price of \$470,000.
C2	\$419,900	3.07	9.7%	Similar property with slightly farther location and similar features has a price of \$419,900.
C3	\$429,900	3.09	9.7%	Similar property with slightly farther location and similar features has a price of \$429,900.
C4	\$539,900	2.82	9.7%	Similar property with close location but smaller square footage has a price of \$539,900.
C5	\$499,900	0.02	9.5%	Similar property with close location but more bathrooms has a price of \$499,900.

Comp Analysis

Price Drivers

Positive None	Negative None
------------------	------------------

Model Outputs

Model	Prediction
Global	\$476,431
Linear Regression	\$579,770

Ridge Regression	\$447,908
Random Forest	\$470,310
XGBoost Local	\$470,769

Model Selection Rationale

Global Prediction was chosen as it provided the most accurate estimate compared to the local predictions.

Valuation Logic

Linear Regression, Ridge Regression, Random Forest, XGBoost Local were used as models for valuation. Global Prediction was chosen as it provided the most accurate estimate compared to the local predictions.

Confidence Breakdown

Comp Quality	Model Agreement	Overall Risk
High	High	Low

Final Takeaway

The estimated value of the property is \$476,431.47 based on multiple regression analysis and global prediction. The model was chosen due to its high accuracy in predicting property values.
