| C4 | \$1,699,800 | 4.70          | 15.0%     | The comparable property has a smaller square footage but a higher price.                   |
| C5 | \$1,208,000 | 4.54          | 11.9%     | The comparable property has a larger square footage but a lower price.                     |

## Comp Analysis

### Price Drivers

|                  |                  |
|------------------|------------------|
| Positive<br>None | Negative<br>None |
|------------------|------------------|

## Model Outputs

| Model             | Prediction  |
|-------------------|-------------|
| Global            | \$1,179,472 |
| Linear Regression | \$706,032   |

|                  |             |
|------------------|-------------|
| Ridge Regression | \$1,170,731 |
| Random Forest    | \$1,168,416 |
| XGBoost Local    | \$1,138,051 |

Model Selection Rationale

The global prediction model was chosen as it has the highest confidence level and encompasses all available data.

Valuation Logic

The global prediction model takes into account all available data and makes a single prediction for the property's value.

Confidence Breakdown

| Comp Quality | Model Agreement | Overall Risk |
|--------------|-----------------|--------------|
| High         | High            | Low          |

Final Takeaway

The estimated value of the property is \$1,179,473 based on a high confidence global prediction model.
