

Property Appraisal Report

Prepared: June 01, 2026 | Query Index: 31255 | Confidence: High

Estimated Value	Actual Price	Delta	Model Used
\$260,193	\$295,000	\$-34,807	Local Predictions

Executive Summary

The estimated value of the property is \$260,192.67 based on local predictions. The models used for prediction were Linear Regression, Ridge Regression, Random Forest, and XGBoost Local.

Comparable Sales

#	Price	Location (km)	Influence	Reason
C1	\$285,000	0.58	47.6%	Similar property with a small difference in square footage.
C2	\$285,000	0.58	16.8%	Similar property with a slightly smaller square footage.
C3	\$269,000	0.18	16.0%	Property with a smaller square footage but closer location.
C4	\$239,000	3.81	12.4%	Property with a smaller square footage and further location.
C5	\$274,900	5.73	7.2%	Property with a larger square footage but further location.

Comp Analysis

Price Drivers

Positive None	Negative None
------------------	------------------

Model Outputs

Model	Prediction
Global	\$260,193
Linear Regression	\$295,681

Ridge Regression	\$270,387
Random Forest	\$268,620
XGBoost Local	\$284,996

Model Selection Rationale

The chosen model is the local predictions as it combines multiple models to provide a more accurate estimation.

Valuation Logic

Local predictions combine the performance of various machine learning models to estimate the property value. The property's features and similar properties are considered in the valuation process.

Confidence Breakdown

Comp Quality	Model Agreement	Overall Risk
High	Medium	Low

Final Takeaway

The estimated value of the property is \$260,192.67 with a high confidence level based on local predictions. The chosen model combines multiple models to provide a more accurate estimation.
