

Property Appraisal Report

Prepared: May 31, 2026 | Query Index: 11764 | Confidence: High

Estimated Value	Actual Price	Delta	Model Used
\$1,068,442	\$1,398,000	\$-329,558	Global Prediction

Executive Summary

The estimated value is lower than the actual price, with a difference of \$329,557.5. The global prediction model was used for this analysis.

Comparable Sales

#	Price	Location (km)	Influence	Reason
C1	\$1,438,000	2.15	46.0%	Similar property with a higher price and close location distance
C2	\$879,800	4.15	27.9%	Similar property with a lower price and moderate location distance
C3	\$849,999	16.65	10.1%	Similar property with a lower price and far location distance
C4	\$950,000	4.93	8.9%	Similar property with a higher price and moderate location distance
C5	\$959,000	12.14	7.2%	Similar property with a higher price and far location distance

Comp Analysis

Price Drivers

Positive None	Negative None
------------------	------------------

Model Outputs

Model	Prediction
Global	\$1,068,442
Linear Regression	\$1,558,115

Ridge Regression	\$1,067,822
Random Forest	\$1,162,185
XGBoost Local	\$1,427,468

Model Selection Rationale

The global prediction model provided the closest estimate to the actual price

Valuation Logic

The global prediction model uses a combination of all local predictions (Linear Regression, Ridge Regression, Random Forest, XGBoost Local) to make the final estimate.

Confidence Breakdown

Comp Quality	Model Agreement	Overall Risk
High	Low	Medium

Final Takeaway

The estimated value is lower than the actual price, but the analysis indicates a moderate overall risk due to low model agreement. It is important to consider additional factors and market trends when making final valuation decisions.
